Step 2:

Connect All Components (Without Seat Back)

Fig. 1

Fig. 2

Fig. 3

A. To connect the chairs you must first prepare the female connector. On the bottom of the left side (when facing chair) of each seat is the female connector. This is shipped in the closed position. Rotate the connector toward the outside of the chair 90 degrees as shown in Fig. 1. We suggest that two people do this so one can hold the chair steady.

B. On the bottom of the right side (when facing chair) of the chair is the male connector. To connect the chairs, align the two connectors as shown in Fig. 2, and push the chairs together as shown in figure 3.

TO SEPARATE THE CHAIRS:

The chairs can be easily separated by lifting up the right side of the left adjacent chair while someone else pulls the right side chair away. Lifting the chair disengages the male connection pin from the female connector.

Step 3:

Attaching the Seat Back

A. On the bottom of each seat back you will see two metal female connectors as shown in Fig. 4. Carefully align these with the bars on the base of the chair as shown. Be careful to insert the seat back evenly.

TO REMOVE THE SEAT BACK:

To remove the seat back carefully rock the seat back side to side while pulling up.
